

# NPOL Radar Scientist Report 1200 UTC 03 May 2011

Submitted by weixinxu on Tue, 05/03/2011 - 07:32

- [NPOL](#)

Flight Date:

Tuesday, May 3, 2011

Status:

Green

Shift Summary for 0000-1200 UTC May3:

This shift only observes a shallow precipitation band coming from the NW into the radar view. This precip. band propagates SE and drops a little rain over the SGP site. But observable precip. lasted only for the first two hours, when NPOL has some PPIs and RHIs over the CF site. Otherwise, the weather is very quite from 0300 UTC to 1200 UTC.
